

Important Irrigation Update – Effective Immediately

Good afternoon, Vicenza residents,

As you know, I have had my hands in quite a few project buckets throughout the community, and I wanted to provide an important irrigation update.

Effective immediately, the Vicenza irrigation pump will be shut down on Saturdays and Sundays. This means that no residential homes or common areas will receive irrigation water on either of these days.

This change is being implemented as part of our continued effort to combat current drought conditions and reduce our overall water usage. We are also significantly reducing watering times throughout many of the common areas, with the exception of areas containing new sod, landscaping, and plantings that require additional watering while they become established.

It is imperative that we all do our part, and the Association is making every effort to reduce water consumption wherever possible.

If you need to water plants or landscaping on Saturday or Sunday, you must hand water.

Please also remember that residential homes are permitted to irrigate only one day per week. As a general guideline:

- Sod/grass areas: approximately 20 minutes per zone
- Garden and landscape areas: approximately 10–15 minutes per zone

Thank you for your cooperation and for helping us conserve water throughout Vicenza. Every little bit helps!

Sincerely,

Citizens Management Services, Inc. on behalf of Vicenza Neighborhood Association, Inc.
